Locate your distribution center at a BNSF Logistics Park

BNSF LOGISTICS PARKS AND INTERMODAL FACILITIES

BNSF
RAILWAY

Transportation costs typically account for more than 50% of total distribution costs. Locating your distribution center or warehouse at a BNSF Logistics Park can substantially lower those costs, reducing drayage charges, maximizing truck turns, gaining significant savings on fuel, and lowering your emissions. A competitive cost per square foot will further boost your bottom line. Let BNSF Railway help you achieve a leaner, greener supply chain.

WHY IT'S LOGICAL TO LOCATE at a BNSF Logistics Park

Closer is Better

With volatile fuel costs and more stringent emissions standards, cutting all the extra miles you can from your supply chain is crucial to reducing costs and protecting the environment. By locating at a BNSF Logistics Park, you realize significant cost savings.

Let's say you're considering two locations for a distribution center.

Site A is at a BNSF Logistics Park.
Site B is 20 miles away.

With 5,000 annual inbound intermodal shipments:

- You save \$90 in drayage costs per unit at Site A.
- You save \$450,000 on your inbound shipments to your DC at Site A.
- This equals \$0.90 per sq. ft. for a 500,000 sq. ft. facility.

Value-Boosting Benefits

By locating your distribution center or warehouse at a BNSF Logistics Park, you can:

- Reduce Drayage Charges
- Lower Fuel Costs by Cutting Fuel Consumption
- Decrease Emissions
- Maximize Truck Turns
- Minimize the Number of Trucks and Drivers Needed

Strategic Locations

BNSF Railway's Logistics Parks and Intermodal Facilities are strategically located so you can easily serve major markets across the country via our vast intermodal network.

BNSF has the facilities to help you reach the markets you need:

Foreign Trade Zone Benefits

To accommodate international shippers, some BNSF Logistics Parks are Foreign Trade Zones, which are specifically designated areas considered to be outside the Customs Territory of the U.S.

The benefits of a Foreign Trade Zone may include:

- > Accelerated Supply Chain
- > Merchandise Processing Fees Reduction
- > Duty Savings
- > Reduced Inventory Tax

BNSF is Here to Help

BNSF Railway's Economic Development Team can help you find the ideal location to maximize the efficiency of your supply chain. We work closely with you through the entire process to establish the transportation and distribution center solutions that are customized to your enterprise.
